

## Release Notes Feb 18, 5.5.0.0

Type	Description	Requires support to activate
New feature	While booking order from Backend it is now possible to save one draft order per user. This means a user can save draft order and abort order booking, and later continue and finalizing the draft order. The draft order has no effect on balance, and does not appear in listings such as order listings and reports until it is finalized.	No
New feature	The system now supports agreed order, a new order type making it possible to define an agreed amount of goods to be sold to a customer over a certain time period. No goods are delivered until a backend user calls off items off the order.	User training recommended
Improvement	The supplier agreement has been extended with informational (no logic) data about payments details for the supplier.	No
Improvement	The copy product feature has been extended to be able to copy more data related to the product. These entities include Replacement products, Alternative products, Product properties, Product categories, Statistical categorization.	No
Improvement	Possible to define an explicit email for dispatch advice on customer. When booking order from standard order booking page this will automatically read into corresponding order data field.	No
Bug fix	Customer BCC email address could not be removed once entered and saved from Backend UI. This has now been resolved.	No
Bug fix	When copying an order with a delivery time span windows defined, the system failed to save the order copy. This has now been resolved.	No
Bug fix	An issue with decimal quantities for warehouse purchase orders has been resolved. The system allows decimal quantities for service products, but when confirming such a quantity decimal information was lost.	No
Bug fix	An issue with order popup window not displaying top of page date has been resolved.	No
